Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 50-75 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

This is **NEW MATTER** rejection.

The recited % elongation with the given condition has no support in the originally filed specification. For example, the recited 1100% is based on the examples 24-26 wherein other condition is used. For example, films having a dimension of 4 mm width and 85 and 130 μ m thickness are used.

The recited "**blend**" has no support in the originally filed specification. Applicant states that the prior art does not teach a PHB blend in combination with a nucleant as claimed. But, the instant claims recite P3HB4HB, not PHB. There is no disclosure with respect to the recited P3HB4HB blend. The disclosure with respect to said P3HB4HB on pages 6, 16 and 17 and in examples 24-26 does **not** teach any blend at all. The specification teaches the blend with respect to PHA, PHB and/or PHBV in combination with a **plasticizer** (oligoester). See Summary of the Invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1714

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 65 and 68 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recited % elongation has little probative value absent particular sample since said % elongation is dependent on the sample used. For example, aged (not fresh made) films having a dimension of 4 mm width and 85 and 130 μ m thickness are used in examples 24-26. Obviously, the thicker film would have a higher % elongation at break.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 50-75 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nagaoka et al (US 5,688,582) in view of JP 4-326932, JP 6-336523 or JP 6157878A2.=.

Rejection is maintained for reason of record since applicant failed to respond to the rejection. Furthermore, Nagaoka et al teach polyester blends in abstract and examples.

Art Unit: 1714

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
